Quick Guide for using DVR

1. HOW TO START

This guide covers the 4, 8, 16-channel DVRs. The DVRs are identical except for the number of cameras, audio, inputs and alarms. The illustrations and descriptions in this manual refer to the 16-channel model.

• Connect camera cables for monitoring and recording, and VGA cable for monitor display. (if you have CRT monitor use BNC connector)

• System starts automatically once the power cable is connected.

2. HOW TO LOG-IN

Requires ID and PW to enter main menu of DVR system.
 Default ID and PW are as follow: ID: Administrator / Password: None

Login
ID : Administrator ▼ Pass w ord :
OK Cancel
0123456789

• NO Password is set as default PW. Please DO NOT forget to set new PW for the system security. For new password setting please go to password setup menu under Password of Menu on the screen (MENU > SYSTEM > User).

3. HOW TO RECORD

- DVR starts recording automatically when cameras are connected.
 DVR will record images at Max.ips (images per second) for each camera with standard image quality as default. More detail recording options can be set in the system.
- Please refer to the manual 2-4-2. MENU > RECORD > Record.

*Note

- a. For proper recording, recommended HDD should be installed before turning on DVR.b. HDD needs to be formatted before recording. Please refer to
 - 2-4-1. MENU > RECORD > Storage in main manual for HDD format instructions

4. HOW TO PLAYBACK

• Press 'Playback' button to enter playback mode or click right mouse button to select 'Playback' option.

- Select desired search option form the main menu
- a. Go to Time: enter time/date to search specific data

5. HOW TO BACKUP

- Press the 'Backup' button or go to Backup menu under Contextual Menu appears by clicking right button on the Mouse to enter Backup menu.
- Use USB Storage (USB Memory or ODD, HDD) to backup recorded data. Recommend to have USB device connected before go into back up menu.

The DVR and Client program on PC start searching each other once they are on the same local network. The Auto Detection menu shows the DVRS detected on the same local network.

Note: Auto Detecttion finds DVRs on the local network automatically. To use this function, Apple® Bonjour® needs to be installed in PC. Please refer to http://www.apple.com/bonjour for more details and download.

6. Remote Upgrade

The system upgrade can be done through Nemon program on PC.

- Click on 🗘 and Remote Setup to enter remote setup menu.
- Select Information under System.
- Click Upgrade next to S/W version to find a file for upgrade
- Select the file location and the file to upgrade the system.

Note: Please do not close down Nemon S/W or power off a computer until the system upgrade is completed.
