

Playback Instructions

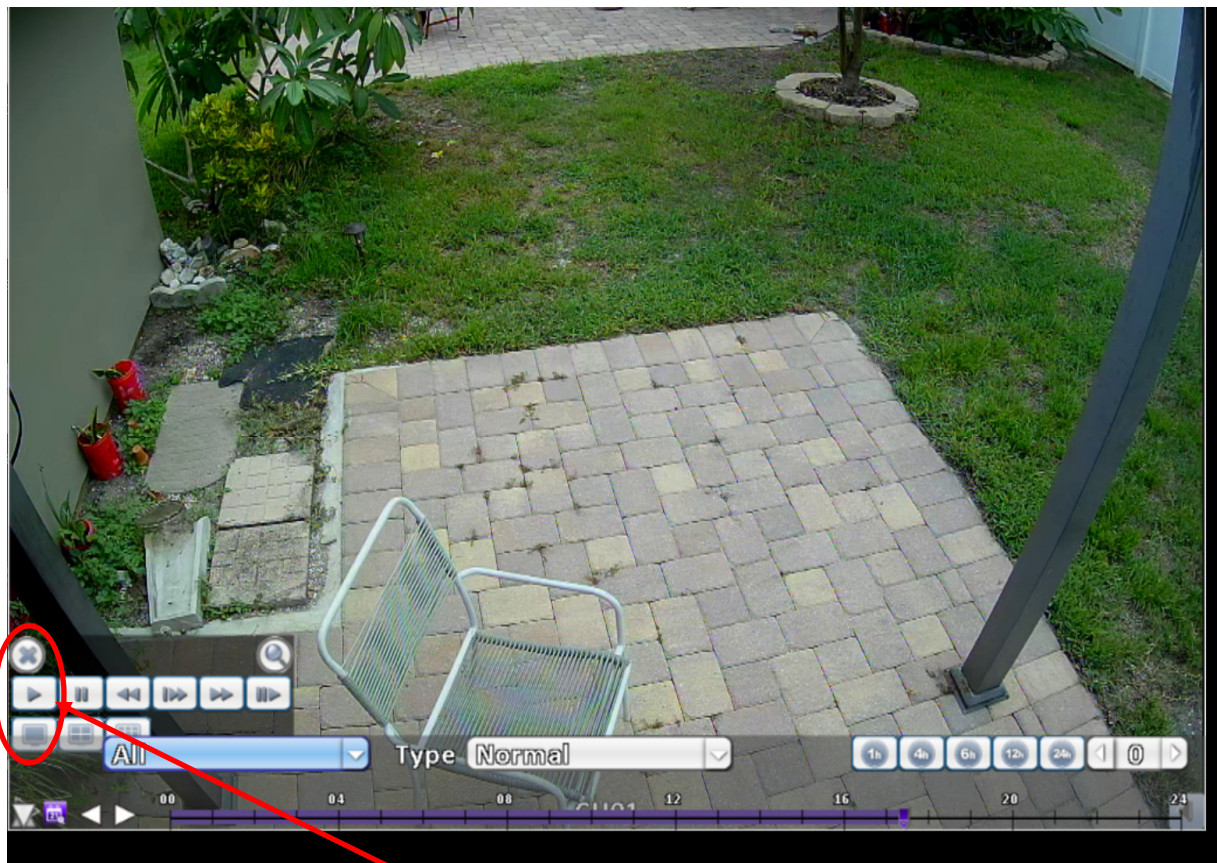

This feature is used to review events that occurred within the last hour

Press the right button on your mouse; a black rectangular box will appear; select the playback icon

After selecting playback, this window will appear

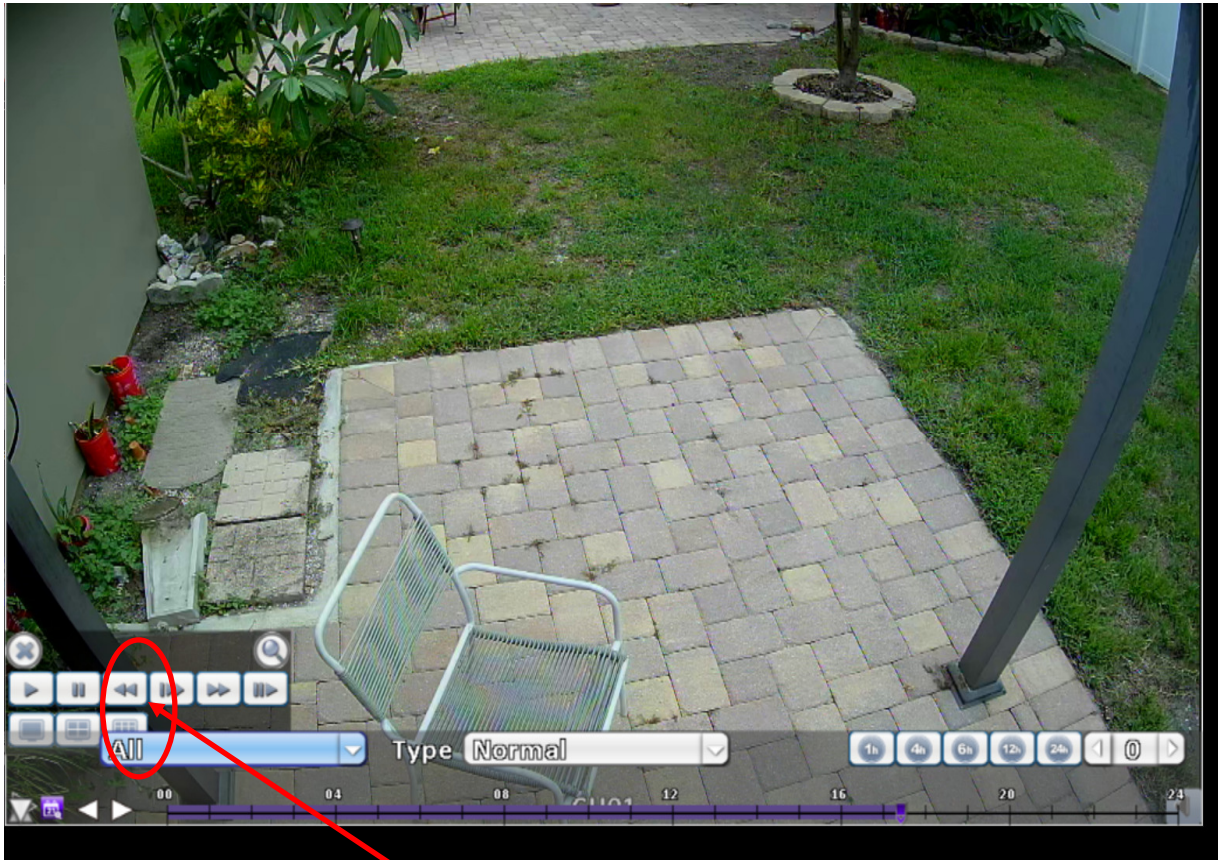

Select play button to view recorded footage

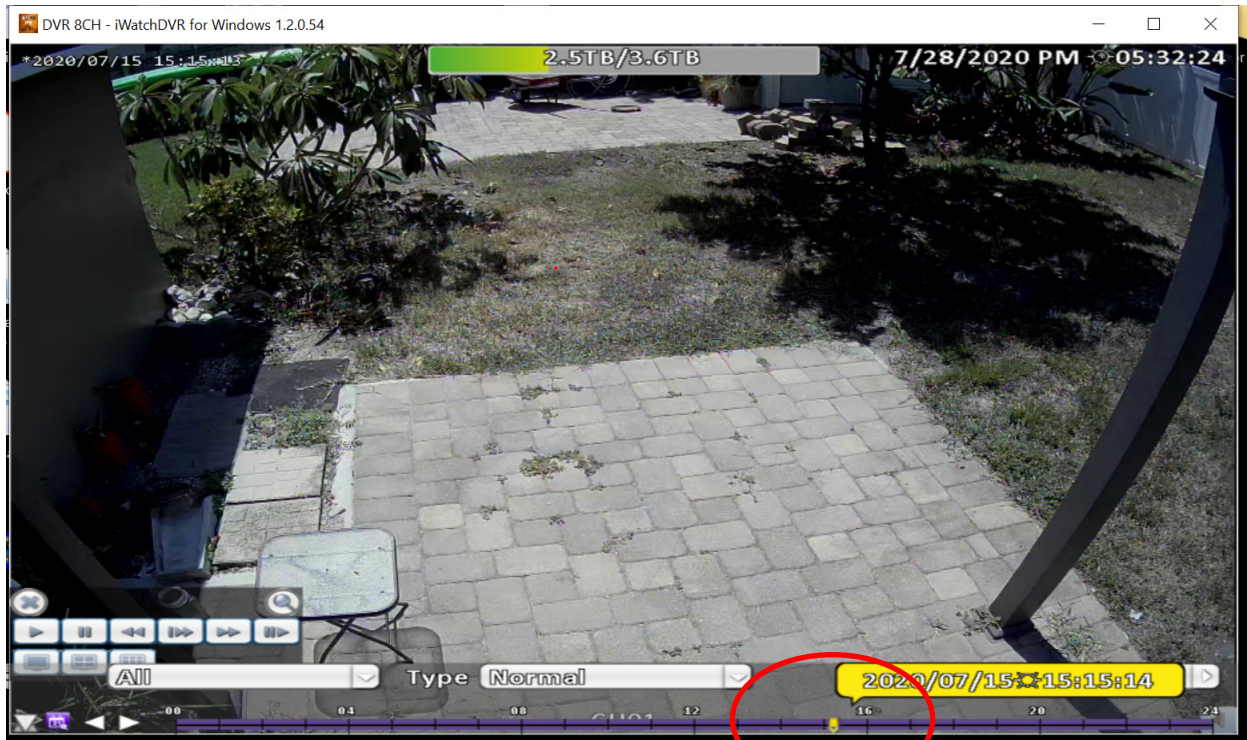

Select Fast Forward Icon to increase speed

Note: The more times you press the button the faster the video will play

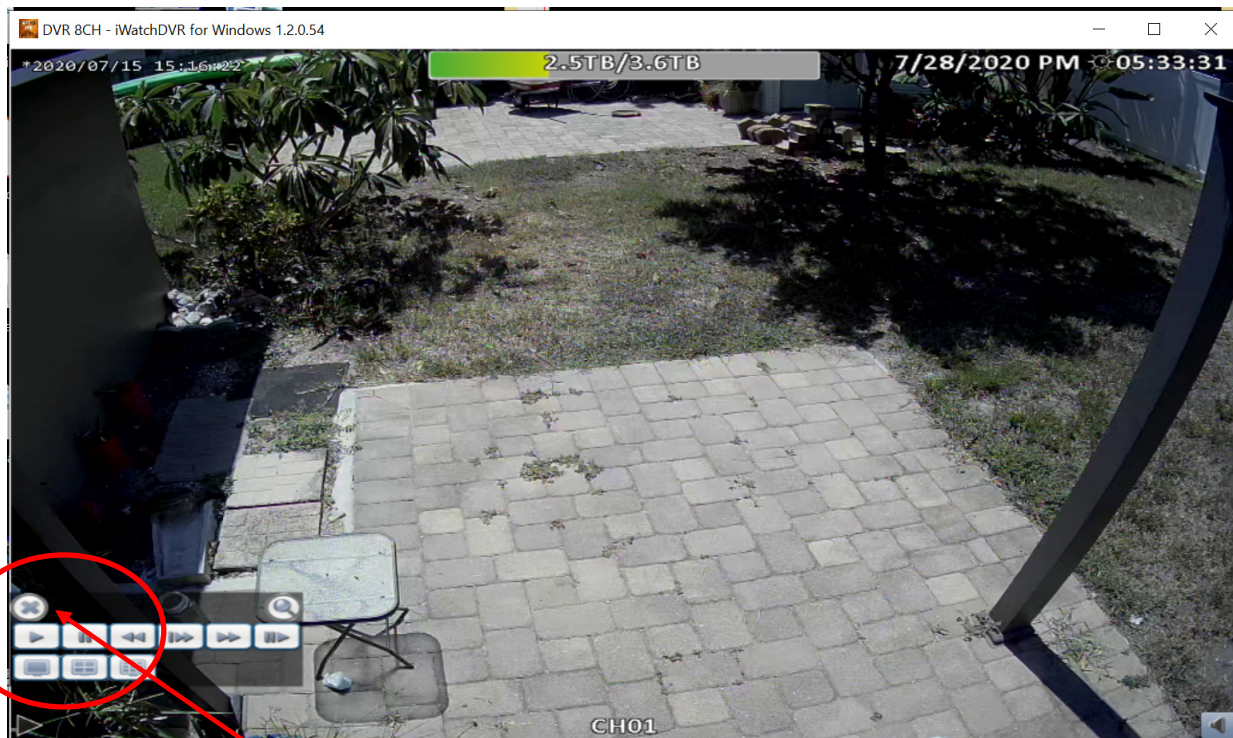

Select Rewind Icon to go backward in time

Note: The more times you press the button the faster the video will play

Another way to go forward or backwards in time is by sliding the time bar

Time bar is display on military time

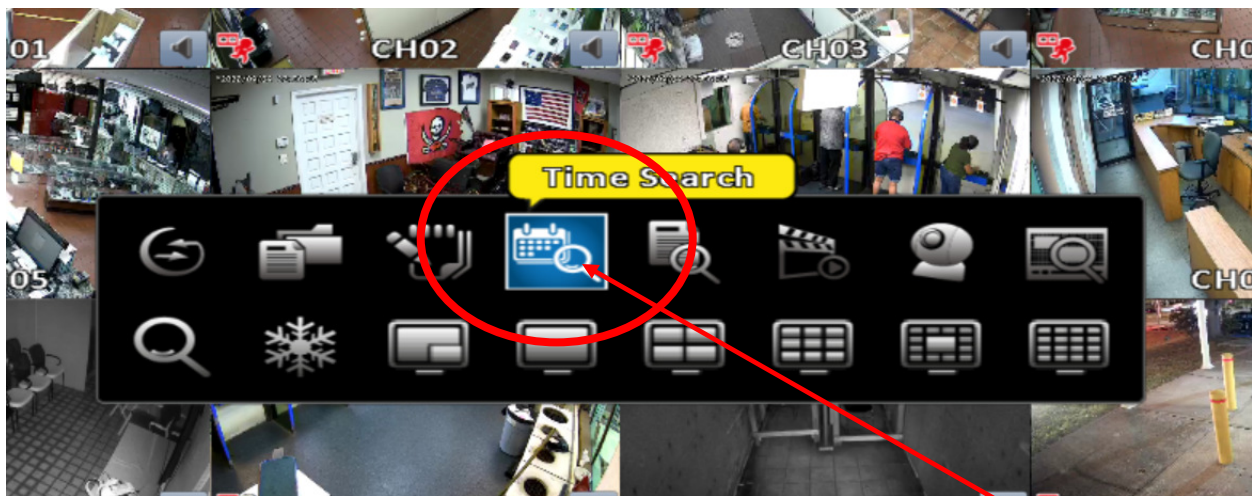

To exit playback click on the X

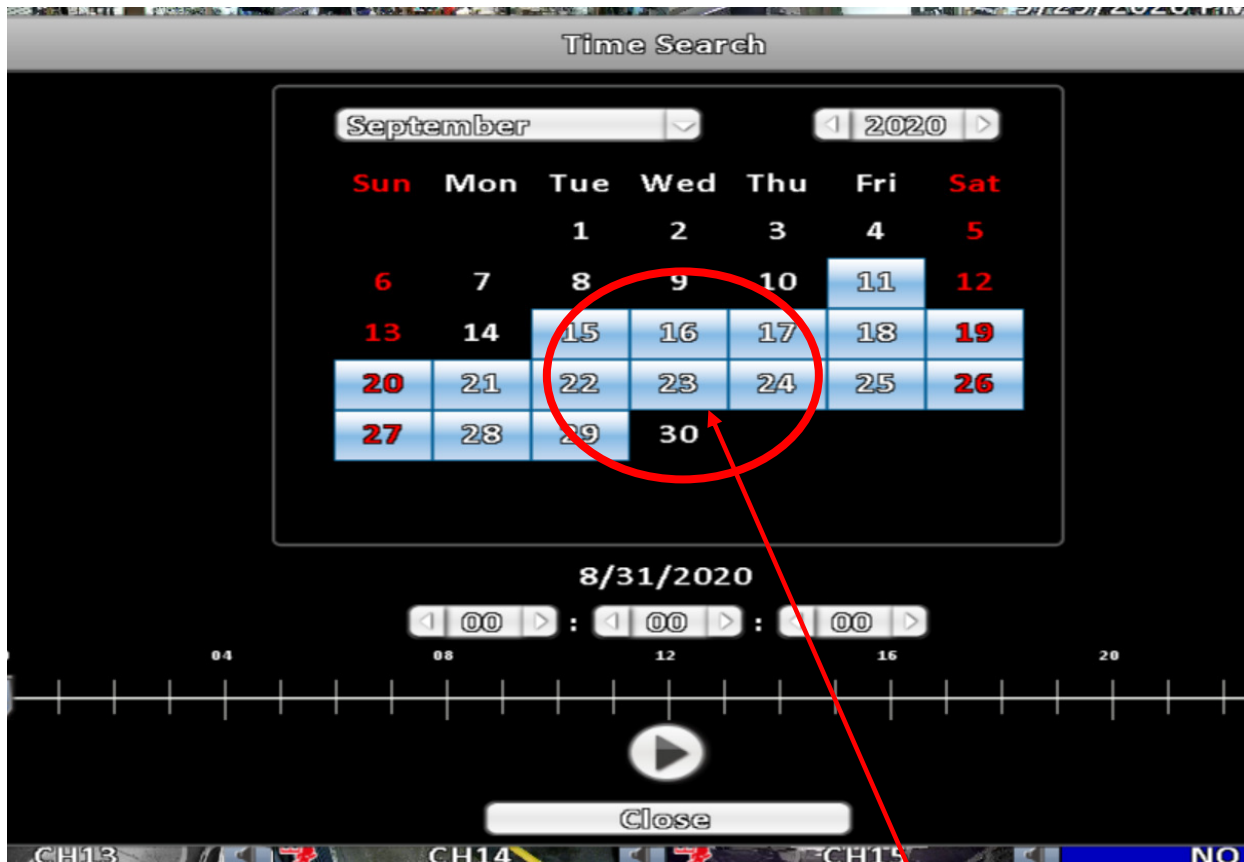

Time Search

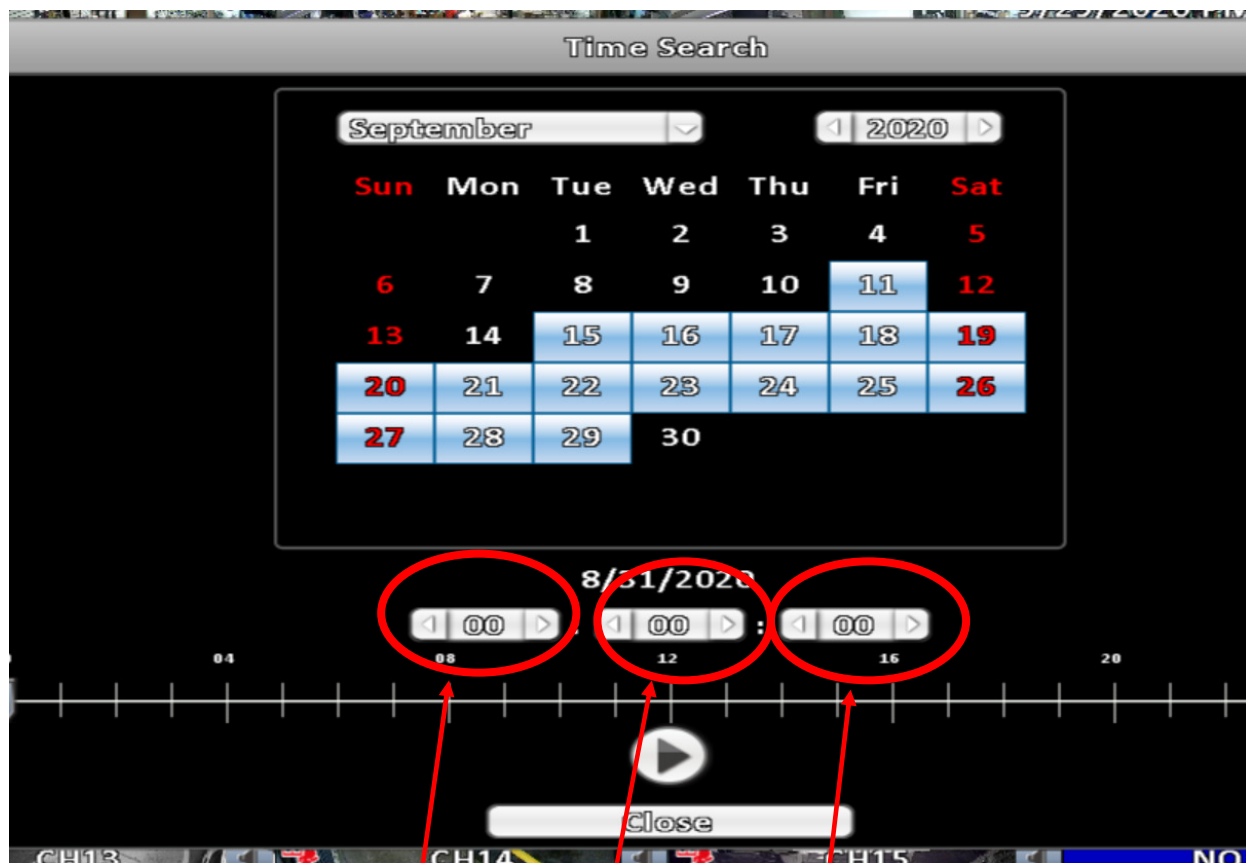

This feature is used to go back and search video footage of past dates

Press the right button on your mouse; a black rectangular box will appear; select time search icon

Select date; please note that blue highlighted dates indicate that video footage is available on those dates.

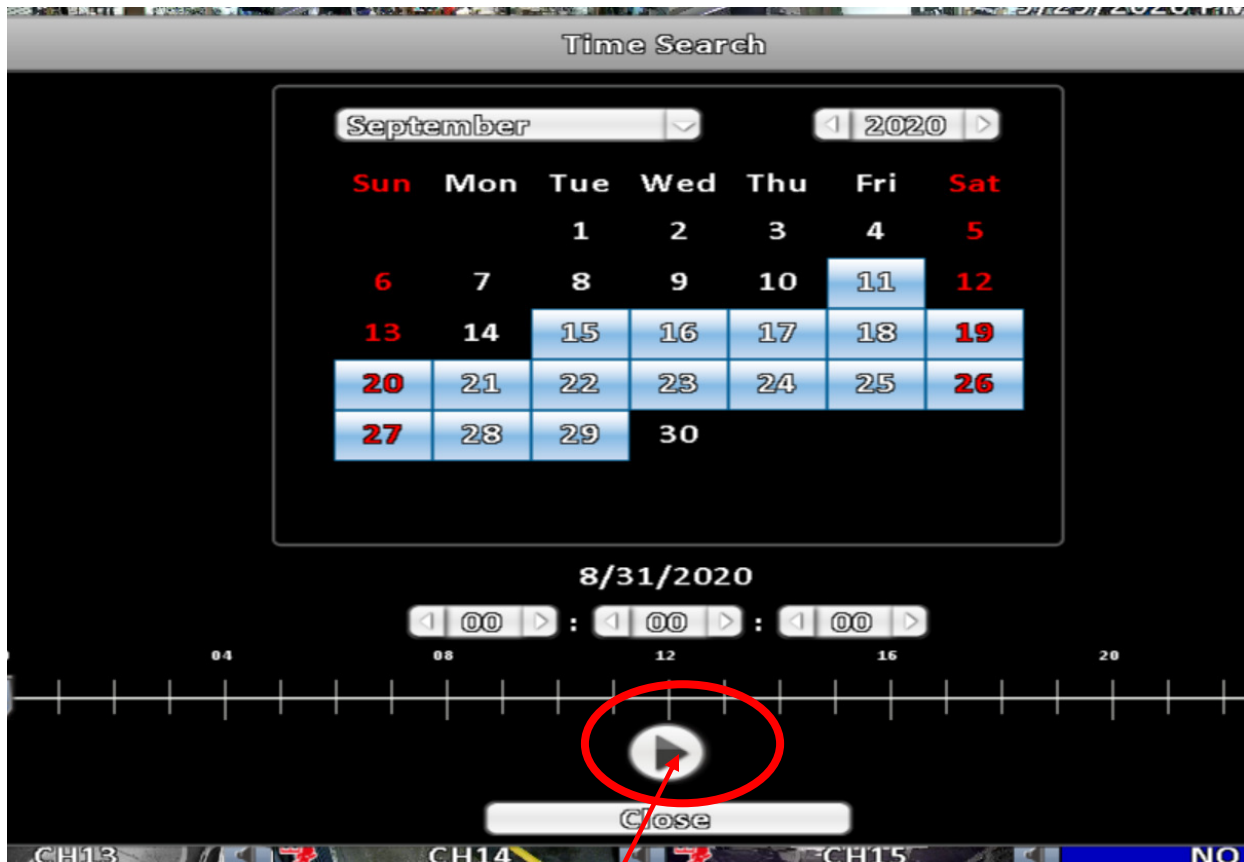

Then select time:

Hour

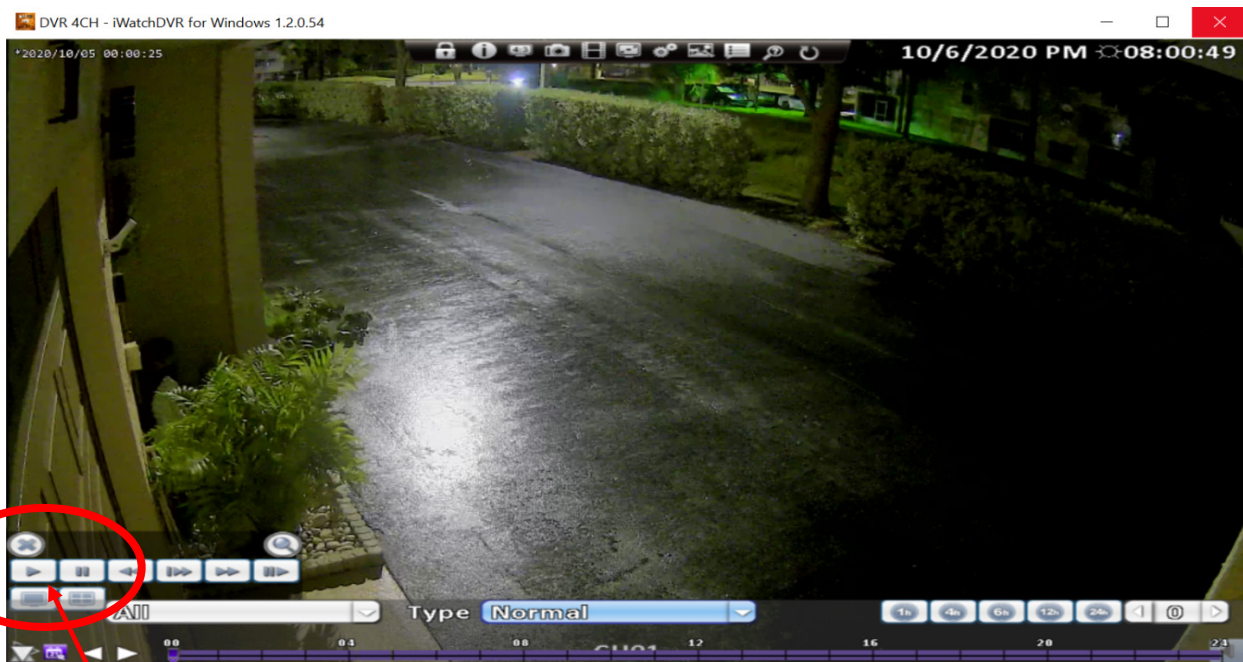

Minutes

Seconds

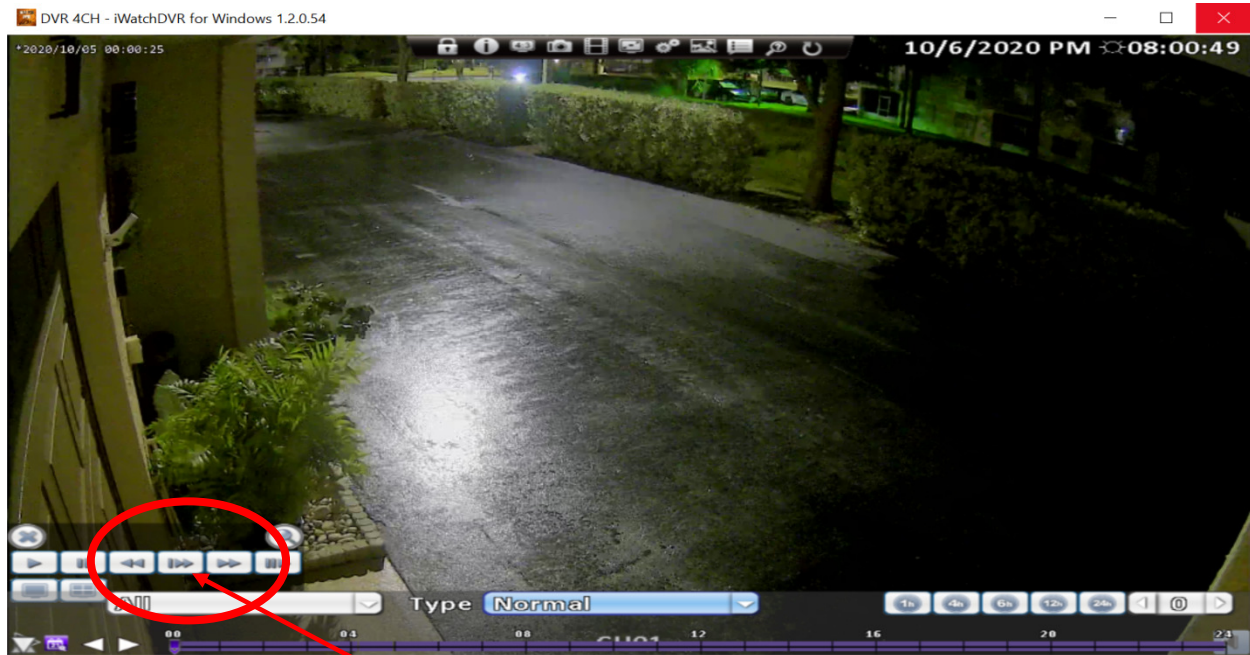

Remember it is military time format

Click the play button

Select play button to view recorded footage

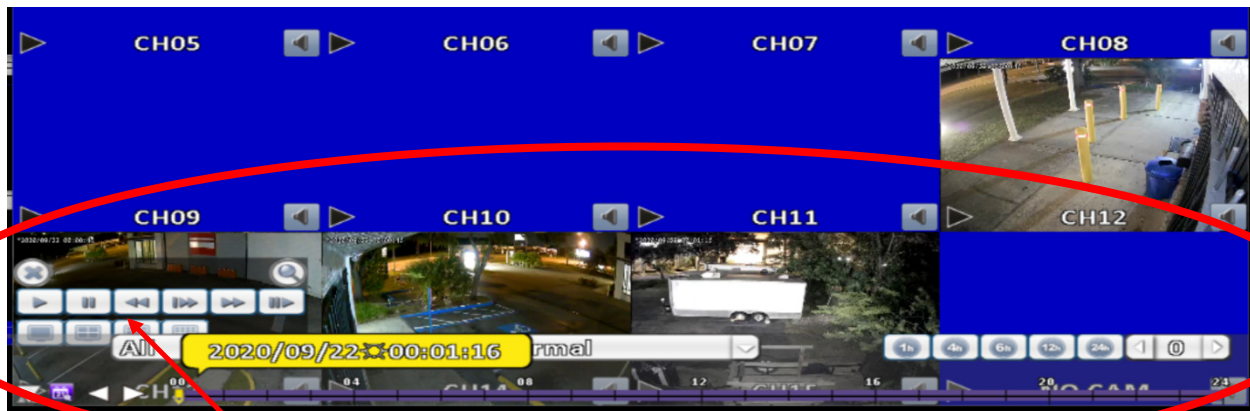

This button is used to slow motion playback

Press once for $\frac{1}{2}$ speeds

Press twice for $\frac{1}{4}$ speed

Press 3 times for $\frac{1}{8}$ speed

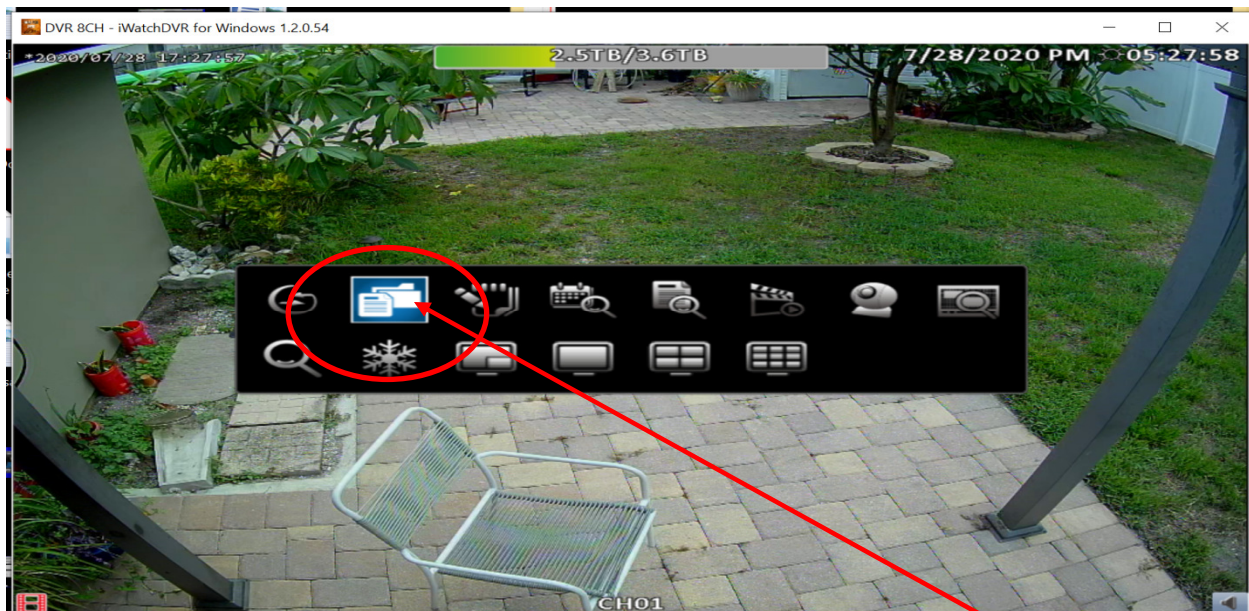

Use same functions as playback

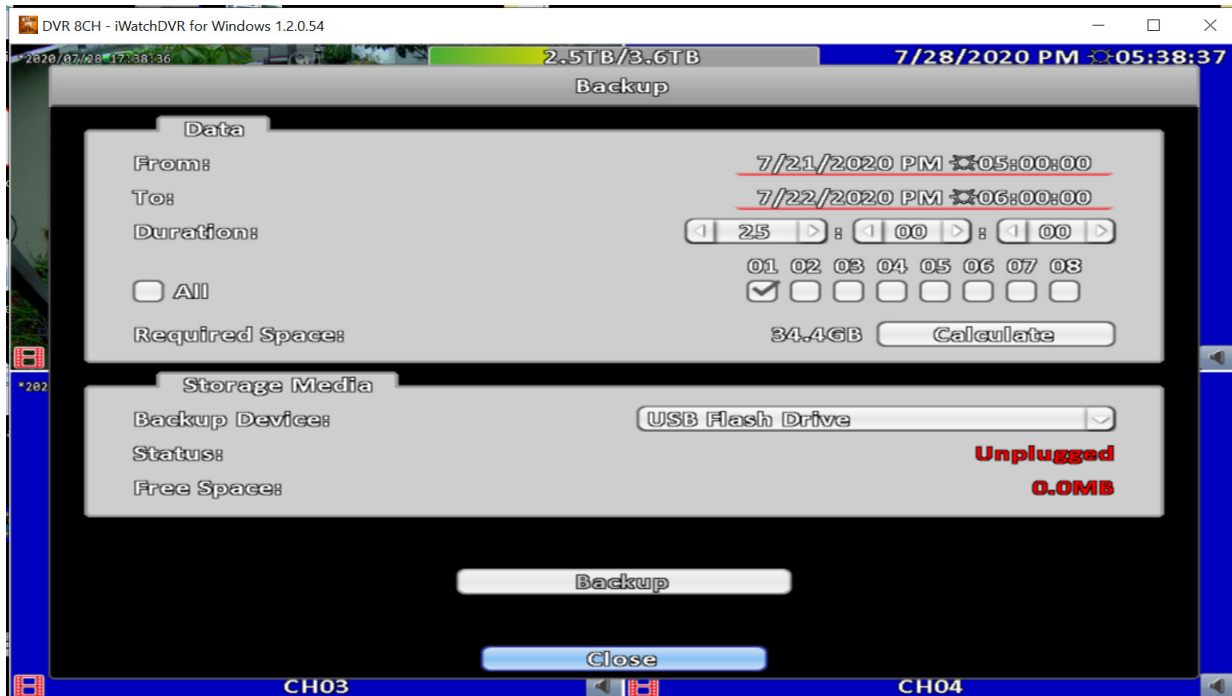

Remember you can search time using the slice bar

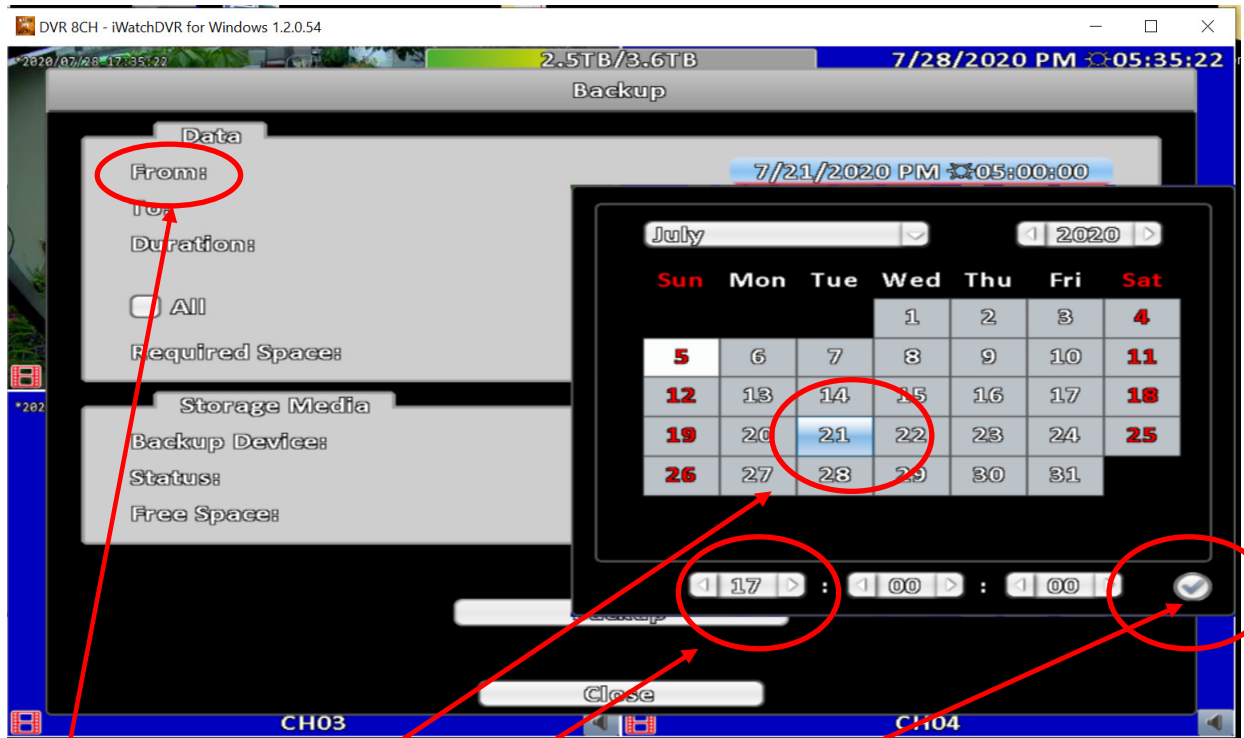

Back up Instructions
