

8/16 Channel H.264 Stand-Alone DVR

User's Manual

- H.264 Stand-Alone DVR
- Superior Video Quality
- S-ATA Hard Disc Drive
- USB Mouse & Backup
- Advanced Network Features

Preface

We welcome you as a new user of the world's best digital video recorder (DVR), and the leading Digital Video Surveillance System. For effective usage, please read this manual carefully. For future reference, please keep this manual close to hand.

Copyright/Authentication/Trademark/Limited Warranty

Copyright

This manual is produced under copyright law. None of its contents may be copied or duplicated without prior approval.

Copyright 2009~

Authentication

CE, FCC, KCC

Trademark

Ethernet(TM) is the trademark of Xerox Corporation.

Microsoft(TM), MS-DOS(TM), Windows(TM logo), Windows(TM) and Windows NT(TM) are the trademarks of Microsoft Corporation, used in the United States and elsewhere.

Limited Warranty

- The manufacturer, importer and agent shall not be responsible for accidental damage (including injury) and other damage caused by inappropriate use or operation of this product.
- The information in this manual is prepared based on the current specifications for the product. The manufacturer is currently adding new functions and will continue to upgrade the product with new technology. All specifications may be changed without notice to individual users.

Cautions

We strongly recommend that users read all safety cautions carefully before operating the product, to operate the product appropriately.

Since the indicated cautions contain critical safety information, they must be fully complied with. The cautions are categorized into Danger, Warning, Caution and Important.

Danger	Risk of death or serious injury. This is the highest priority danger warning.	
Warning	Risk of serious or lesser degree of injury. May also cause damage to the product or to property.	
Caution	Risk of minor injury or damage.	
Important	Requirements or limitations regarding operation. Users are recommended to read the relevant details carefully so as to operate the product properly and without harm.	

The above cautions indicate the degree of damage that may occur due to inappropriate use of the system.

Risk of death or serious injury. This is the highest priority danger warning.

- RISK OF EXPLOSION IF BATTERY IS REPLACED BY INCORRECT TYPE. DISPOSE OF USED BATTERY ACCORDING TO THE INSTRCTIONS.
- THIS EQUIPMENT IS INDOOR USE AND ALL THE COMMUNICATION WIRINGS ARE LIMITED TO INSIDE OF THE BUILDING.
- Please connect the power cord only to the type of AC outlet indicated in the manual or product specification. If connected to other types of power outlet, fire and electric shock may result.
- Do not expose the product to moisture and dampness. Doing so may result in fire and electric shock.
- Do not place heavy objects on top of the power cord. Damage to the power cord may result in fire and electric shock.
- Do not place containers with liquid or small metal objects on top of the product. Liquid or small metal objects getting into the unit may lead to fire and electric shock.
- Do not score, bend, twist, pull or heat the power cord. Damage to the power cord may lead to fire and electric shock.
- Do not remove the top casing of the product. Doing so may result in electric shock. If internal examination and maintenance are deemed necessary, contact the authorized system vendors or installers.
- Do not modify the product in any way. Doing so may lead to fire and electric shock.
- In case of lightning, immediately turn off the power switch and remove the power cord from the power outlet. Failure to do so may result in fire and electric shock.
- Please use only the power cord supplied with the product. Use of other power cords may result in fire and electric shock.
- In case of smoke, smell or noise, immediately turn off the power switch and remove the power cord from the power outlet. Continued operation of the product may result in fire and electric shock. Request a maintenance service from the authorized system vendors or installers.
- If the product is dropped or damaged, turn off the power switch and remove the power cord from the power outlet. Continued operation of the product may result in fire and electric shock. Users should request a maintenance service from the authorized system vendors or installers.
- Do not touch the product with wet hands. Doing so may result in electric shock.

Risk of serious or lesser degree of injury. May also cause damage to the product or to property.

- Do not leave the power cord or other cables in passageways. Passers-by may trip and fall.
- Avoid contact with water or beverages. Contact with water or beverages may result in damage that cannot be repaired.
- In case of lightning, immediately turn off the power switch and remove the power cord from the power outlet. The product may otherwise be damaged.
- Excessive current from the product and the camera may result in an electric shock. Connect the power cord to an external device only when the products themselves are disconnected from their power supply.

Risk of minor injury or damage.

- If a foreign substance is stuck to the product, remove it using a soft cloth or tissue. Do not use chemical agents (thinner, solvent, etc.) to remove the substance.
- Do not operate or store the product in the following places.
 - An area that is either too cold or too hot
 - An area of high humidity, or in front of an air-conditioner, or in places subject to sudden temperature changes
 - An area where there is excessive dust
 - Areas where heat from the product cannot be emitted through both of the product's side ventilation openings
- Do not place credit cards/telephone cards/bank account books/tickets and other objects with magnetic properties near the product.
- Static electricity may cause damage to the internal parts of the product. Please remove static electricity from your body before touching the rear panel and internal electronic parts of the product.
- If this product is damaged beyond repair or reaches its maximum service life, dispose of it in compliance with local laws and regulations regarding the disposal of lead and plastic waste.

Requirements or limitations regarding operation. Users are recommended to read the relevant details carefully so as to operate the product properly and without harm.

- The product may not work properly if the power source is unstable or and if electric shock occurs. Make sure the correct rated power is available.
- The product is designed to be proof against electric power failures; however, damage may occur as a result of power failure. Current data may be damaged or data might not be recorded. Make sure to use an Uninterruptible Power Supply (UPS).
- Since the product is designed to record video data on the hard disk, an error in the hard disk or other miscellaneous errors might prevent the product from recording properly. Periodic maintenance is required for proper operation of the product.
- The product is designed for users to configure their own interface. However a user configuration error could lead to operation malfunction. This product should be set up by certified installers only.
- Since the product is connected and tightly coupled to exterior accessories (camera, sensor, LAN, Hard Disk, etc.), there is a risk of malfunction from external causes. Ensure periodic maintenance by the certified installers.
- Use the rack mounting handle provided with the product for installation.
- In this product, 1 Kbyte equals 1,024 bytes, 1 Mbyte equals 1,024,000 bytes and 1 Gbyte equals 1,024,000,000 bytes.

Chapter 1. Introduction

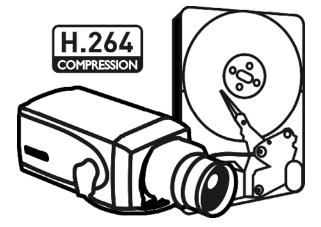

1. The System

Great Value but Less Budget Product is in Your Hand now. No more to find high quality product with affordable target price in the market. As part of $4 \sim 16$ channel DVR series, this DVR is the exact solution what you looking for in four channel DVR. The big demand of real H.264 four channel DVR with high performance and stability but pay less from end users make it possible to launch the DVR.

With our full built-in function, you don't need to waste of your time to find four channel solution of yours. Now you can have the great value product from us to make your full H.264 DVR product line unique.

2. General Features

- True H.264 Standard Video Compression
- Embedded Linux System to give you the Ultimate Reliability
- Dedicated DB Structure for Stability
- Various Recording Resolution D1/Half D1/CIF
- CMS (Central Monitoring System)
- Easy Setup same like DVR GUI in CMS
- Web Monitoring, Searching and Setup
- Own Media Player for Backup Playback
- Four USB Port for Mouse operation, Multi USB Hub and Backup
- Up to Four SATA HDD and No Limitation of Capacity
- Two- Way Audio
- Multiple DVRs can be operated with One Keyboard Controller
- Text-In & Relay Output Support
- 4 Audio Input support
- Spot Output with Event Pop up Function

3. Specification

Model		8 Channel	16 Channel		
Video	In	8 BNC	16 BNC

Chapter 2. System Installation

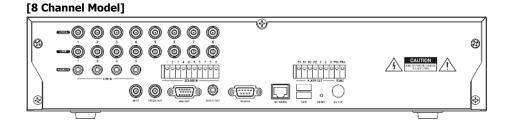

1. Package Contents

The following components are included in the product:

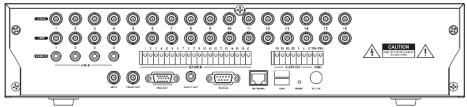

DVR Unit	DVR Unit
DC Adaptor	
Power Cord	9
CD (User's Manual & Network S/W)	
Remote Controller	
Quick Guide	Quick Guide

2. Connecting Devices

The rear panels of the DVR comprise the following:

[16 Channel Model]

Video Input (\bigcirc) (0) 0 ര [[0 [[0] (0) ((0) ((0) 0 ((0) 0 ဨ \odot (\bigcirc) Connect the coaxial cables from the cameras to the BNC video connectors.

Connect the coaxial cables from the Loop BNC connector to another device.

Audio Input

The DVR can record audio up to 4 sources. Connect the audio sources to the Audio-In RCA connectors. Audio input channels need external pre-amplifiers. It is the user's responsibility to determine if local laws and regulations permit recording audio.

Connect the main monitor to either the Video Out (CVBS) or VGA out connector. Connect the spot monitor to the SPOT connector as needed.

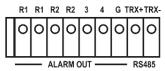

- Audio Out: The DVR does not have amplified audio output, so you will need a speaker with and amplifier.
- **RS-232C**: An RS-232C connector is provided to connect an ATM or POS machine for Text-In function. Use a cable with a DB9 (female) connector to connect to the DVR.
- Network: Connect a Cat5 cable with an RJ-45 connector to the DVR connector for remote monitoring, remote playback, remote setup. See *Chapter 3-2. DVR Configuration* for configuring the Network connections.
- USB: Four USB ports are provided to connect external devices like HDD, Flash memory for Backup, System upgrade or USB mouse. Two USB ports is located on the rear panel and the other two are on the front panel. A USB mouse can be connected only front panel USB port dedicated only for mouse.
- **Reset**: The DVR has a Reset switch that will only be used to return all the settings to the original factory settings. To reset the unit, turn the DVR off first. Turn it on again while poking the straightened paperclip in the reset hole. Hold the switch until the DVR is initializing.
- **Power Connector**: Connect adapter cable to the power connector on the rear panel. (DC12V, 6.67A) Input AC power to the adapter. (free voltage from 100V to 240V, 50/60Hz)

Sensor Input

16(8) sensor input connectors are provided to connect external devices. You can use sensors to signal the DVR with event. To make connections on the terminal block, press and hold the button and insert the wire in the hole below the button.

Alarm Output & RS485

4 alarm output connectors are provided to connect external alarms such as sirens or lights. 2 alarm output connectors have internal relays and the others are TTL signals. The RS485 connector can be used to control PTZ cameras. The DVR can also be controlled remotely by a control keyboard.

 Front USB: Two USB ports are provided to connect external devices like HDD, Flash memory for Backup, System upgrade or USB mouse on the front panel. A USB mouse can be connected only front panel USB port dedicated only for mouse.

Note: This manual covers 8-channel and 16-channel DVRs. The DVRs are identical except for the number of cameras, audio inputs and alarms. The illustrations and descriptions in this manual refer to the 16 channel model.

3. Cautions

- Avoid installing the product where there are direct rays or it is hot by locating near from heat generator. (May cause fire)
- Do not put vase, flowerpot, cup, cosmetics, drug, and anything the contain water on product. (May cause fire or electric shock, and it may injure people by falling)
- Do not insert or drop any metal object (coin, hair pin) or flammable object (match, paper) into air hole. (May cause fire or electric shock)
- Do not put any heavy object on it. (May injure people by being fell or destroyed.)
- Put power plug surely not to be moved. (If not, this may cause fire.)
- Unplug power plug and antenna when there are thunders and lightening. (May cause fire.)
- For cleaning the product, wipe surface with dry towel. Using chemical agent or cleaner may change the color and unpeel paint.
- Do not put several plugs at same time. (May cause electric shock.) If there is smoke or strange smell, stop operation. In this case, turn the power off and unplug it, and then contact our service center. (If you keep using it, this may cause fire or electric shock.)
- Do not unplug by pulling cord. (If cord is damaged, it may cause fire or electric shock.)
- Do not plug or unplug with wet hands. (May cause electric shock.)
- Keep the power cord untwisted. (May cause fire or electric shock.)
- Use proper adapter. (Using too much electric power may cause fire or electric shock.)
- Do not install it at where exposed to rain and wind and water drop. (May cause fire, electric shock and transformation.)
- Keep away from fire. (May cause fire.)
- Do not disassemble or remodel on your own. (May cause malfunction or electric shock.)
- Do not put next to flammable materials like flammable spray. (May cause fire.)
- Do not install it at a place with too much dirt. (May cause fire.)
- Do not install it on unstable places like shaking table and inclined place or shaking place. (May injure users by falling down or being upside down.)
- Do not put an heavy object on power cord or avoid it from being pressed by the device. (May cause fire or electric shock.)
- In case of using extension cord, do not use several devices at same time. (May cause fire with abnormal heating of extension.)
- When there are dirt on power plug pin or power outlet, clean it nicely. (May cause fire.)
- Do not damage on power cord or plug, and bend or twist or pull too much, and put it between other objects or heat. If power outlet insertion part is not tight, do not use it. (May cause fire or electric shock.)
- Do not drop or give a shock to the product. (May injure people or cause malfunction.)
- Do not touch power adaptor or signal controller. (May cause electric shock.)
- Do not put any object too close to block cooling fan. (May cause fire.)
- In case of exchanging batteries with improper type, there might be danger of explosion.
- For used batteries, throw away separately from other garbage.
- When you take out batteries, avoid children from eating them by mistake. Keep them away from children. (If a child ate them, contact a doctor right away.)

Chapter 3. Using DVR

1. Basic Operation

1-1. Front Panel & IR Remote Controller

The DVR should be correctly installed before proceeding. The location and the shape of the buttons may vary depending on the DVR model.

Control	Description	
USB Port	Two USB ports are located on the front panel. A USB mouse can be connected USB port dedicated only for mouse as picture directed.	
Camera Buttons (1~0)	Pressing camera buttons and Enter button will cause the selected camera to display full screen. Buttons are used to enter passwords.	
MENU / EXIT Button	Enters the Setup Menu. User will need to enter the authorized password to assess Setup. In Playback mode, MENU button displays the Playback Menu.	
DISPLAY Button	Changes the screen display mode in the current screen or playback screen.	
SEQUENCE Button	Displays live channels sequentially.	
Up, Down, Left, Right Arrow, ENTER Buttons	These are used to change settings for the product in MENU mode or used in PTZ control mode. (pan, tilt)	
BACKUP Button	Copies recorded data to an external storage device.	
PLAYBACK Button	Changes to the playback mode from the live mode.	
II PAUSE Button	Under playback mode, the button can be used to pause the playback screen. - Display menu to save PTZ preset under PTZ mode.	
► PLAY Button	 Plays the video forward. Press the button repeatedly to increase play speed up to max 32 times (1, 2, 4, 8, 16, 32 times) faster. Use this button to move right when setting the menu. Focus on far distance under PTZ mode. 	
■ R.PLAY Button	 Plays the video backward. Press the button repeatedly to increase play speed up to max 32 times (1, 2, 4, 8, 16, 32 times) faster. Use this button to move right when setting the menu. Zoom Out under PTZ mode. 	
I▶ STEP FORWARD Button	Move forward by one frame under Pause. Use this button to move up when setting the menu. - Focus on near distance under PTZ mode.	
∢I STEP BACKWARD Button	Move backward by one frame under Pause. Use this button to move down when setting the menu.	

	- Zoom In under PTZ mode.	
EJECT Button	It will open or close the backup drive such as CD-RW or DVD - Display menu to load PTZ presets under PTZ mode.	
PTZ Button	Changes to the PTZ control mode from the live mode.	
ZOOM Button	Zooms the current image on the screen.	
PIP Button	Changes to PIP screen mode from live screen.	
FREEZE Button	Freeze the current screen.	
AUDIO Button	Selects a camera for live & playback audio output.	
SPOT Button	Assigns the SPOT output channel.	
OSD Button	Turns on/off the OSD display.	
LOG Button	Checks the system's log information.	
ID Button	Selects the DVR system ID. (Remote controller only)	
E.REC Button	Pressing the E.REC button stars Emergency Recording Mode of all camera channels, and displays "!" on the screen. Pressing the button again will stop E.REC mode.	
Status LED	Power, HDD, Network, Alarm	

1-2. Turning on the System

Connecting the power cord will turn on the power of DVR. It will take approximately 10 to 30 seconds for the system to be initialized. Once the system is initialized, it will display live screen, and begin to record video automatically.

- **Note**: To turn off the system, select SHUTDOWN under main menu (MENU > SHUTDOWN) and unplug the power cord when the shutdown message appears.
- **Note**: When installing the HDD for the first time, the HDD should be formatted first. "MENU > RECORD > Storage > HDD format"

1-3. Menu Bar

The menu bar will appear on the bottom of the screen as shown below.

MENU (ð)	0% २ ब 🖊 ♀ 🗇 🕐 2009-05-13 02:08:43 PM 🗒		
MENU	Pressing the Menu will bring up the main menu list.		
8 0%	Shows the % of HDD being used.		
.	Turns on when the HDD is set to be overwritten.		
	Sequence display mode.		
×	Turns on when the system is connected to the network.		
	·		

Û	Turns on when the Alarm is being activated.	
•	E.REC (Emergency Recording) Mode.	
2009-04-03 07:31:32 PM	Displays date & time.	
50 00 00	IR Remote Controller

For more information on Contextual Menu please refer to 2. DVR Configuration.

2. DVR Configuration

2-1. SYSTEM

Under SYSTEM menu, System configuration options for general Information, Date & Time, User, Quick Setup and System Log can be selected.

2-1-1.MENU>SYSTEM>Information

In the Information screen, DVR Name, System Version, Upgrade, Mac Address and Configuration options can be selected. Highlight and press DVR Name P to enter or change DVR name. Name the DVR by using the virtual keyboard.

To Upgrade the system, save the upgrade file to USB Flash Memory and connect it to DVR. Once the Device is connected, press Upgrade button to execute system upgrade. Upgrade will take approximately 5 minutes. DVR will reboot automatically when the upgrade is completed.

Note: DO NOT remove USB Flash Memory or turn off the system during the upgrade. Removing USB Flash Memory or Turning off the system during the upgrade may cause system malfunctioning.

Remote Control ID

Enter Remote Control ID to control multiple DVRs individually. If Remote Control ID remains as 0, Remote ID does not have to be selected when using remote controller. It will work as general ID for any remote controls and a remote control will communicate with any DVRs with ID 0.

Video Type

The system automatically detects camera signal types as NTSC/PAL. But the system also offers manual selection options for different signal types.

Configuration

System settings can be saved and loaded using Configuration option Export: Save settings to USB Flash Memory Import: Load saved settings from USB Flash Memory Default: Load factory default settings

Note: Configuration Import does not affect or changes system and network settings. Network settings will also not be changed when selecting Default option.

SYSTEM : User User Group Administrator Auto Login : DIT 1 Auto Logout (min) : ÷ DIT User Group Administrator Administrato 2 3 4 5 6 Uper UBe < 1/2 > Ŧ σĸ Cancel MENU OI 2010-10-26 11:10:52 AM

Press User Tab to enter/add a new user.

Auto Login: It allows a user to log in right after the system boots up automatically. As a system allows auto log in without the authentication process please make sure DVR has a limited access by non authorized personnel.

In the Date & Time, Time Zone, Date, Time, NTP Server, Holiday options can be selected.

Highlight and press Time Zone 🔽 to select right Time Zone.

Select 'Use Daylight Saving Time' if it is applicable. Enter start and end date/time for local 'Daylight Saving Time'.

Press 🗄 button to set up Date and Time. Press Format button to select a date & time display

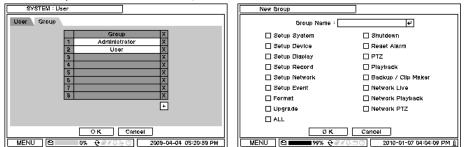

Select 'Use NTP' to enter Time Servers to be synchronized with DVR. Highlight and press to enter Time Server using the virtual keyboard. Press 'Update' to synchronize the DVR time with the registered time server.

Note: NTP is not essential for DVR operation. Any type of Standard Time Server can be used (e.g. time.windows.com). Time Synch might not be completed due to heavy traffic or delays

Note: There are some Holidays fall on different days. Therefore, they have to be updated every year.

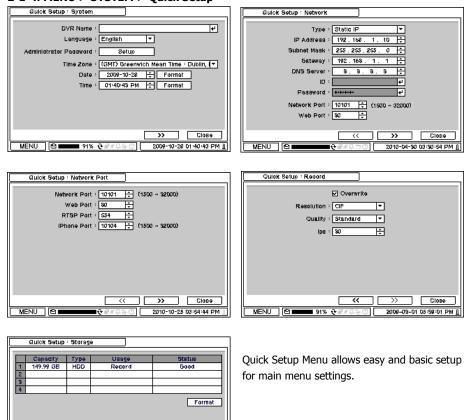

Auto Logout: Turn On or Off Auto Logout option.
Press ★ to add a new user. To remove an existing user, press X next to it.
User Name: Enter a user name
Group: Select a Group which a new user will belong to
Password: Set a new password or change a password.

Note : DO NOT have to enter Current password when setting password for the first time as there is no default password for Administrator/User.

Set user registration and access rights for the system. Press Group tap to add and set group. Press 🕂 to add a new group. Enter a group name and select access rights for a group. To remove an existing Group, press 🗵 next to it.

In Record Tools, estimated HDD usage and recording period can be calculated. Press Calculate once resolutions, ips, number of cameras and quality are set. The recording period is calculated based the size of HDD installed.

The GB size shows the HDD size requires for a day recording. Day and Hours shows the period can be recorded based on the installed HDD size.

Note: The calculation results show approximate data only. Same frame rate and video quality does not guarantee same storage size and recording duration. This is due to the variety of conditions on images such as more/less colors or more/less movements. This situational variance will affect the file sizes more at lower frame rate settings.

Note: Changes Ips manually. It does not change Ips according to the change of resolution.

Note: approximate size for each resolution - CIF: 360X240, Half D1: 720x240, D1: 720x480

The system allows Text In from POS/ATM machines.

Note: For use of POS/ATM, the system must support general ASCII code.

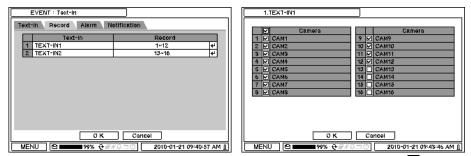

Text-In Model: Select Text-In model from the list

Transaction Begin: Enter a word which the transaction info to be displayed on screen as a start. **Any Character**: Check Any Character to start display a text with any character as a start. **Transaction End**: Enter a word of last line where the transaction info to be displayed on screen as the end. If you want additional lines to be displayed after the transaction end, select more line options.

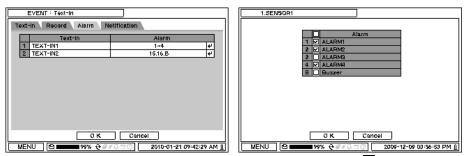

Ignore String: Enter a word to ignore strings includes selected word.

Line Delimiter: Enter a symbol or a word to distinguish the end of lines.

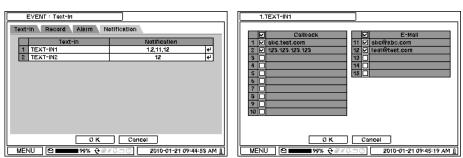

Case Sensitive: Select Case Sensitive option if distinguish a word with case sensitivity.

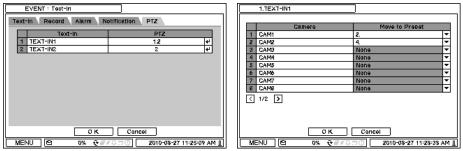

In Record, text event can be synchronized with single or multi camera record. Press (\pounds) to select camera(s) to be synchronized with text event. If RS232/RS485 Port are being used at the same time, it has to be used for different cameras. For example, if RS232 is set for cameras 1~12, RS485 should be set with 13~16. They can't share same cameras.

In Alarm, text event can be synchronized with single or multi alarms. Press 4 to select alarms to be synchronized with text event. If B is selected, system will buzz on alarm detections.

In Notification, text event can be synchronized with single and multi callback or emailing sites. Press $\textcircled{\baselinetwise}$ to enter callback or email address to be synchronized with text event.

In Text In, each text input can be synchronized with single and multi cameras. Press I to select cameras to be synchronized with text inputs.

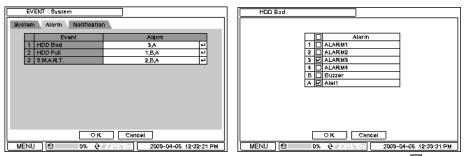

2-6-5. MENU > EVENT > System

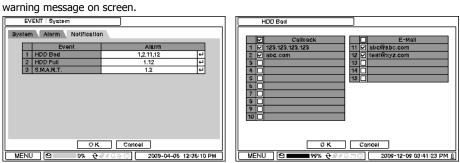

In System, S.M.A.R.T function monitors storage conditions such as Temperature, Conditions and Recording.

S.M.A.R.T Threshold allows to pre set tolerable temperature level of storage. If HDD temperature increases over pre set temperature, it will notify a user in various ways according to following settings.

Record Threshold option can be set to notify a message for the indication of HDD storage usage level. Warning message can be notified in various ways as described below.

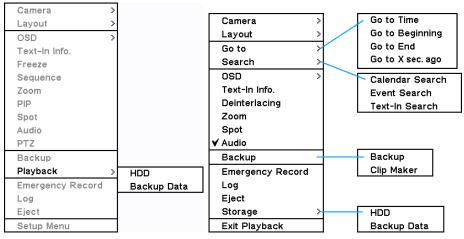

In Alarm, each system event can be synchronized with single and multi alarms. Press $\textcircled{\baselinetwise}$ to select alarms to be synchronized with each event. If Alert is selected, system will pop up a

In Notification, each system events can be synchronized with single and multi callback or emailing sites. Press 🕑 to enter callback or email address to be synchronized with system events.

3. Playback

The system provides various playback menu to search recorded data. Please click right Mouse button on Search Mode and select the storage type. If backup data is selected, the data on external HDD can be searched.

Camera : Select camera no.

Layout : Select display mode (8/16 ch. DVR Only)

Go to : Search recorded data by time/date. Move to the beginning or end of recorded data. Also search data by 5/10/15/30/60 seconds backward from the current time of search.

.....

Search : Select Calendar Search, Event Search and Text In Search

OSD : Select OSD display option

Text-In Info.: Select Text display option for POS or ATM machines.

Deinterlacing: De Interlacing for D1 resolution

Zoom : Zoom in image by X2

Spot : Select each spot monitors' display

Audio : Select Audio outs

Backup : Select backup or Clip Copy option

E. Record : Start Emergency Recording

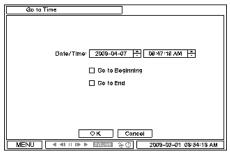

Log : Select System/Event log

Eject : Open installed ODD

Storage : Select playback storage option

Exit Playback: Exit Search Mode and return to Live Mode

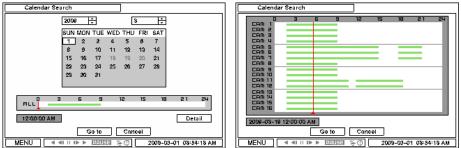

3-1. Go to Time

Go to Beginning : Move to the very first recorded data.

Go to End : Move to the latest recorded data.

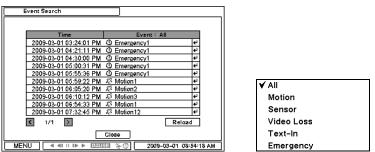

3-2. Calendar Search

Calendar Search provides easy graphical search by displaying numbers (dates). Dates with recorded data will be highlighted. Once you select the date, it will display record time table below. The numbers on the top of the table shows the time frame in 24hours format, and titles on the left indicate cameras numbers. The color bar shows the full information of recorded data on the selected date. Move the indicator (line) to select specific recorded time of the selected date. For a detail display of recorded data please press Detail.

Once desired settings are completed, press Go To to begin playback.

3-3. Event Search

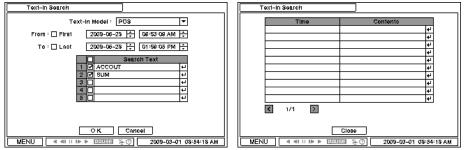

Event Search provides easy search by event list recorded. Select the date and type of event to find specific data. Press Event: All section on the tope of the list to display event search options.

All: System displays every event
Motion: System displays every events related to Motion
Sensor: System displays every events related to Sensor
Video Loss: System displays every events related to Video Loss
Text-In: System displays every events related to Text In
Emergency: System displays every events related to Emergency Recording

Once find specific list of event, move up and down button to highlight the log and press it to playback the event data.

3-4. Text-In Search

Text In Search provides easy search by transactions. Search for Time and Transaction information. Press Search for detail information.

.....

Text In Model: Select a model type for Text In

From: Set beginning time to start search or select First for search from the first data.To: Set end time to end search or select Last for search to the last data.Search Text: Enter any words to search text data include the words.

Once entering all the search information, press OK to start Text In search.

3-5. Backup Data Playback

Backup files on backup medias can be played on DVR. Insert the media with backup files and select a file to playback it on DVR.

I III > PRUSE

R.Play: Reverse Playback
Step Backward: Go to the previous image
Pause: Freeze or Stop current image
Step Forward: Go to the next image
Play: Play the data at normal speed

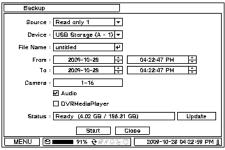

To control the backward and forward playback speed, press on \blacktriangleleft or \blacktriangleright repeatedly. Playback speed can increase up to x32.

4. Backup

Recorded data can be backed up on USB Flash memory. Select backup or Clip Copy option during Search or Live mode by selecting Backup.

Zoom	
Spot	
¥ Audio	
Backup	Backup
Emergency Record	Clip Maker
Log	

4-1. Backup

In the BACKUP, the recorded data can be selected for backup to USB devices.

Press USB Device 🔽 to select the type of USB Device connected to the system.

Select Camera number to be backup or All to backup all the data recorded during the selected period. To back up recorded Audio with video data together select Audio.

Status shows capacity of the device being prepared for backup, and it will show backup progress during backup.

The files saved (backup) in DVRMediaPlayer (.exe) format allows multi camera backup and the files would not require any specific codec for playback on PC. To open and play a file saved in DVRMediaPlayer (.exe), double click the file and it will automatically be played on Internet Explore window. This fuction is supported only on Internet Explorer 7.0 or above. *Note*: The backup process could be slowdown if the system is being monitored/playback on the remote using the client program during the backup process.

Note: "DO NOT remove the back up media while the data backup is being processed. It may cause critical damage to either the media or system if the backup media is removed during the backup process."

Note: During the CD or DVD back up the ODD door could be opened and closed as a process of back up. Please do not remove CD or DVD during the back up in any cases until it is done completely.

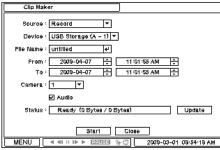

4-2. Instant Backup

Press backup button to start Instant Backup during the playback. Instant Backup window will appear when press backup button during the normal playback mode. Select Device, File Name, Audio and press Start to continue the playback and backup. The Backup Icon will appear on the screen during the Instant Playback. Press backup button one more time to stop and complete Instant Backup.

Note: "DO NOT remove the back up media while the data backup is being processed. It may cause critical damage to either the media or system if the backup media is removed during the backup process."

Note: Playback speed will be slower than usual while instant back up is processing.

4-3. Clip Maker

Clip Maker allows to create single channel backup file which can be played on PC. Select Clip Maker option on the pop up menu during the live or pause mode on the playback.

Select the backup option for Clip Maker. Press Start button to create Clip Maker. Use Quick Time player to play the file created using Clip Maker

Note: The Clip Maker file can not be played on other programs such as Window Media Player.

Chapter 4. Remote Software NEMON

1. Using NEMON

1-1. Starting the Software

Double click on 'Nemon2' icon on PC to run the software. Main screen of the remote software appears as shown below.

Note: A minimum resolution should be more than 1024 x 620; and a recommendable one is over 1280 x 1024.

NEMON NETWORK MONITORIN	G SOFTWARE		¢ ● 8 _ □ ×

Note: The remote software provides interactive setup system that allows easy local DVR settings from remote sites. It gets exactly same menu and options as the local system.

4-3. Remote Upgrade

The system upgrade can be done through Nemon program on PC.

- Click on 🛱 and Remote Setup to enter remote setup menu.
- Select Information under System.
- Click Upgrade next to S/W version to find a file for upgrade
- Select the file location and the file to upgrade the system.

Note: Please do not close down Nemon S/W or power off a computer until the system upgrade is completed.

5. Nemon Callback

Start-> Program -> Nemon2 -> Nemon Callback2

PowerPoint 2003	microsoft Office	•

~						>

Up to 100,000 log can be saved. 1,000 log lists will be displayed per search. Click More button to display next 1,000 logs. Click Export button to save searched logs in either txt or csv format.

Setup: Click Setup button to set a port for Callback. Check Run Callback at Startup of the System box to start Callback program automatically with Window.

Setup	
Callback I	Port 10110 (1500~32000)
	🔽 Run Callback at Startup of the System.
	OK Cancel

Note: UDP port needs to be set (open) to transmit Callback if Firewall is being used.

Appendix A. Remote Access Using I.E.

DVR can be accessed remotely using Internet Explore. Execute internet explore program and enter DVR address (e.g. IP) to get connected.

Remote Log In page appears once connected to DVR. Enter ID, PW and Port information, and select Live or Playback mode to display desired remote control option. Please install Active X when Internet Explore displays Active X installation message.

Remote Monitoring

Remote Playback

Please refer to the remote program 'Nemon' manual if detail instructions on the control option is needed.

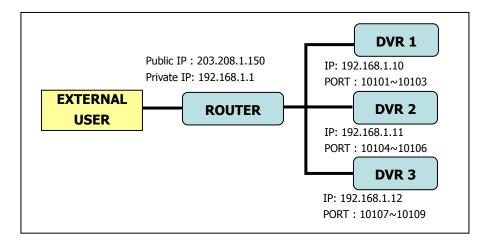

.....

Note: Web is supported only on Internet Explorer 7.0 or above.

Appendix B. How to set DDNS using router

(Except using public IP or connect with ADSL directly)

Make it easy to understand through the example as below. Please refer the Diagram and follow this instruction. For example, If you connect 3 DVRs through local Network.

1. Domain Name Creation

- Go to http://www.dvr-ddns.com/
- Click 'Sign up!' to make the Account.

DDNS can be used once the system is registered on DDNS server. ID and PW are required for the registered server authentication.

COMPLIANCE NOTICE OF FCC:

THIS EQUIPMENT HAS BEEN TESTED AND FOUND TO COMPLY WITH THE LIMITS FOR A CLASS A DIGITAL DEVICE, PURSUANT TO PART 15 OF THE FCC RULES. THESE LIMITS ARE DESIGNED TO PROVIDE REASONABLE PROTECTION AGAINST HARMFUL INTERFERENCE WHEN THE EQUIPMENT IS OPERATED IN A COMMERCIAL ENVIRONMENT. THIS EQUIPMENT GENERATES, USES, AND CAN RADIATE RADIO FREQUENCY ENERGY AND IF NOT INSTALLED AND USED IN ACCORDANCE WITH THE INSTRUCTION MANUAL, MAY CAUSE HARMFUL INTERFERENCE TO RADIO COMMUNICATIONS. OPERATION OF THIS EQUIPMENT IN A RESIDENTIAL AREA IS LIKELY TO CAUSE HARMFUL INTERFERENCE, IN WHICH CASE USERS WILL BE REQUIRED TO CORRECT THE INTERFERENCE AT THEIR OWN EXPENSE.

WARNING: CHANGES OR MODIFICATIONS NOT EXPRESSLY APPROVED BY THE PARTY RESPONSIBLE FOR COMPLIANCE COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT.

THIS CLASS OF DIGITAL APPARATUS MEETS ALL REQUIREMENTS OF THE CANADIAN INTERFERENCE-CAUSING EQUIPMENT REGULATIONS.

WEEE (Waste Electrical & Electronic Equipment)

Correct Disposal of This Product (Applicable in the European Union and other European countries with separate collection systems)

This marking shown on the product or its literature, indicates that it should not be disposed with other household wastes at the end of its working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take this item for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract. This product should not be mixed with other commercial wastes for disposal.
