2780 N. Riverside Dr.
Tampa, FL. 33602**

June 18, 2021

Surveillance Technology, Inc.

In 2021, Dockside Condominium Association's Board of Directors wisely decided that it was time to invest in security measures that would provide the community with a sense of comfort and law enforcement with clear evidence to successfully prosecute trespassers or anyone engaging in criminal activity on our premises. We embarked on installing a camera surveillance system on our property that spans several acres on the Hillsborough River.

Following a thorough study of the varied options available to us, our Security Committee consisting of owners employed in a myriad of professions (i.e.) Engineers, Lawyers, Programmers, Project Management and Law Enforcement recommended that we contract with Surveillance Technology.

Everyone was especially impressed by the fact that Surveillance Technology is a stable, long term local company in Tampa, and that it is dedicated exclusively to providing comprehensive security systems that are individually tailored to meet a community's unique requirements. As a smaller Condominium Community, we were excited to see that you had references from other premier condominiums but afraid that we might not be able to afford your systems.

Representatives visited our site twice to meet with our Board and Owners. All of our questions were answered honestly and with your competitive pricing and innovative programs we were able to secure a *State of the Art* camera system and cabling that will never become obsolete. The equipment was installed right on schedule, by very professional personnel along with the follow-up support and training.

We are very happy and wish to thank Surveillance Technology for helping us achieve our goal.

**Carol Rodriguez
President**
